Subject: FW: FW: Change Request 05 sf

---

Below is John's response to their field change request 05, which has their new approach on **SMA** sampling.

We (Kyle) just sent over the field log forms to John so that he can get an idea of what information they have recorded and what they are now recording.

I agree, we don't have any urgent need to deal with the SMA protocol, but it is in our best interest to know where they are having problems and why, so again documentation is the key. I looked at their change and that seems fine to me.
